## Head Injury Procedure

Children frequently sustain minor head injuries. This advice sheet gives details of what symptoms and signs should be looked for in children who have hit their head whilst at school and when medical advice should be sought.

If after a head injury a child remains unconscious or fits, an ambulance should be called immediately and the parents contacted.

If a child suffers from any of the following symptoms, medical advice must be sought and the child should be taken to see either their Doctor or to A&E by the parents or by school staff.

- Loss of consciousness
- Vomiting
- Sleepiness
- Fits or abnormal limb movements
- Persisting dizziness or difficulty walking
- Strange behaviour or confused speech

Children may appear well immediately after sustaining a head injury but show signs of complications later in the day. School staff must remain vigilant and take the appropriate action if the child develops a problem.

If a child sustains a head injury whilst at school, the following information should be recorded from any witness.

- Was the child behaving unusually before the injury?
- What happened that led to the injury?
- If they fell, how far did they fall?
- What did they hit their head against?
- Did the child lose consciousness? If so, for how long?
- How did they appear afterwards?
- Did they vomit afterwards?
- Was the child observed to have any other problem after the injury?

Regardless of whether the school seeks medical advice about the child, this information should be given to parents for reference should the child's condition worsen. It may be that the child becomes unwell after school and the information will be helpful to parents if they need to see a doctor.

In addition, parents will be notified by phone, following any minor head injury to their child, and invited in to inspect the injury. Each head injury will also be recorded in the accident book, on the pupils Scholarpack Profile and a slip advising of the injury sent home with the child (example below). Both will be completed by the person dealing initially with the accident.

If an accident occurs during break or lunchtime the staff on duty must ensure that the nurse, headmaster, senior teacher, registrar and class teacher are aware of the injury.

The accident form needs to be filled and submitted to the nurse and headmaster.
